

(UPDATED / List of Grid Upgrade legislation & Supporters)

TEAMWORK !!

Introduction: It seems all my lawmakers (of both parties) are scared of their shadow with regard to “doing the right thing” in both “spending cuts” and “tax cuts.” So, I've found more “supporters” for both bills—and am updating my list accordingly.

But besides the “**tax cuts**” and “**spending cuts**” legislation needed, here is a THIRD (3RD) LIST of “Key Supporters” about *another* VERY important matter—which lawmakers need to address: “**Grid Upgrade legislation.**” (*I add: These are related: We must enact “spending” cuts if we want to fund these upgrades.*)

America needs to Upgrade/Harden, Secure, and **PROTECT** our Power/Telecommunications Grid. – THEREFORE, oh ye lawmakers, ye who be afraid—have faith and fear not: See how many **other** supporters there are, and stop cowering in fear: **ACT before we crash the dollar—or (as here)—crash the Grid!!**

By Gordon Wayne Watts,

Editor-in-Chief, *The Register* (GordonWatts.com / GordonWayneWatts.com)

National Director, **CONTRACT WITH AMERICA: PART II**^(TM)

(ContractWithAmerica2.com)

Date: Tuesday, 16 November 2021

My father (the late Bobby Watts, R.I.P., dad) once told me that if I was trying to fight a problem that was too big for me, to NOT “go it alone,” but rather, ask for help from others **to add their voice to mine.** To that end, here are lists (*with references*) of supporters of all bills for which I'm asking your advocacy & support, State and Federal **LAWMAKERS**—both of whom have jurisdiction to act. (In fact, city, county, & other local leaders can, theoretically, act to protect our fragile power/telcom grid—as can individual citizens, to some extent.)

Table of Contents:

(1) Trump EO (Executive Order) and related news

(2) Biden STATEMENTS AND RELEASES and related news

(3) Supporters: Trump, Biden, & Lawmakers—not a comprehensive list—simply representative to give an idea of broad support – in alphabetical order

** Local science experts: **(4) Jim McGuire** **(5) Gordon Watts** **(6) Jim Sapp**

** **(7) Former LPD Sgt. James Ring, currently U.S. Rep. C. Scott Franklin's (R-FL-15) community liaison aka outreach coordinator,**

** **(8) His boss, U.S. Rep. C. Scott Franklin's (R-FL-15), and: (9) YOU, dear reader**

** **(10) John R. Anderson, a constituent of Congressman Franklin, residing in U.S. Congr. Dist. FL-15**

** **(11) Other experts way smarter than you, me, James Ring, Jim McGuire, or even Jim Sapp-combined!**

** **MAGNETIC FIELD COLLAPSE: (12) News18; (13) Phys.org; (14) IndianWeb2**

** **DDoS (Distributed Denial of Service) Cyber-HACKING attacks:**

(15) Forbes ; (16) U.S. Sun ; (17) The Independent

** **SOLAR SUPER STORMS: (18) Solar Super Storm of 2012 ; (19) 1989 Storm ; (20) 2003 Storm**

(21) Key news: From George Noory (CoastToCoast:AM)

(22) A special word from Dr. Peter Vincent Pry, Chief of Staff of the newly re-established Congressional Electromagnetic Pulse (EMP) Commission, and Executive Director of the Task Force on National and Homeland Security – personal email from Dr. Pry to the undersigned writer, Gordon Wayne Watts ///

(23) Key Legislation: From the U.S. House of Representatives and the U.S. Senate

((1)) President Donald J. Trump (R-U.S.A.) – “Trump Acts on Critical Infrastructure Resiliency Against EMP Threats,” by Sonal Patel, *POWER*, 26 March 2019,

Archive-5: https://ContractWithAmerica2.com/EO_ExecutiveOrder-03-26-2019_ProtectingGrid_PDF.pdf

Small 'Fair Use' Quote from *POWER Magazine* article: “President Trump has signed an executive order (EO) to boost coordination for and national resilience against electromagnetic pulse (EMP) threats—both from nuclear warfare and natural events like solar superstorms. The action suggests new federal mandates to protect critical infrastructure against EMP events and attacks may be on the horizon...Industry and academia have warned for years—and the DHS has internally recognized that—EMP events, and especially high-altitude EMP (HEMP) events resulting from detonation of a nuclear device, could severely damage critical electrical infrastructure...If the E3 pulse is high enough and long enough, it can result in grid collapse and potentially damage transformers, experts warn. [] Solar weather events of sufficient intensity can cause E3-type electromagnetic impacts. In 1989, for example, a geomagnetic disturbance (GMD) caused a regional grid collapse within 92 seconds in the Hydro-Quebec power system that left six million customers without power for up to nine hours. The threat of GMDs has been played up with good reason: Space weather researchers currently estimate a 6% to 12% chance that a Carrington-class storm—a solar storm comparable in size to the largest on record—is likely to hit the earth within the next 10 years.”

(2) President Joseph R. “Joe” Biden (D-U.S.A.) – “Biden Rolls Out \$8 Billion Plan For U.S. Power Grid After Texas Crisis,” by Gina Heeb, *Forbes*, April 27, 2021,

Archive-4: https://GordonWayneWatts.com/Biden-GRID_Whitehouse_4-27-2021.pdf

Archive-5: https://ContractWithAmerica2.com/Biden-GRID_Whitehouse_4-27-2021.pdf

Small 'Fair Use' Quote from *FORBES* article: “Today, the White House is making announcements that underscore the Administration’s commitment to accelerating the needed expansion and modernization of America’s power infrastructure to build a more reliable electric grid, create good-paying, union jobs, and deliver clean American energy to American businesses and homeowners. In particular, the Department of Energy is announcing new financial tools to help build high-voltage electric transmission lines, and the Department of Transportation is issuing new guidance that will enable the use of existing rights-of-way to facilitate the siting of transmission lines. An independent analysis, also released today, confirms the importance of investing in our electricity grid. It identifies more than 20 major transmission projects that are poised to move forward, potentially creating more than 600,000 new transmission-related jobs, and an additional 640,000 jobs from new clean energy generation projects enabled by the new transmission lines.”

(3) Supporters: President Trump, President Biden, & Lawmakers—not a comprehensive list—simply representative to give an idea of broad support – **in alphabetical order**) – Besides President Trump, there are lots of supporters –with bipartisan (actually, Tri-partisan) support:

– **Red = Republican** ; **Blue = Democrat** ; **Green = Independent.**

Rep. Bartlett, Roscoe G. [R-MD-6], Pres. Biden, Joseph R. “Joe” [D-USA], Sen. Cantwell, Maria [D-WA], Rep. Clarke, Yvette D. [D-NY-11], Sen. Coons, Christopher A. [D-DE], Sen. Cruz, Ted [R-TX], Rep. Franks, Trent [R-AZ-2], Rep. Johnson, Henry C. "Hank," Jr. [D-GA-4], Sen. Johnson, Ron [R-WI], Rep. Katko, John [R-NY-24], Sen. King, Angus S., Jr. [I-ME], Rep. Lamb, Conor [D-PA-17], Sen. Markey, Edward J. [D-MA], Rep. McNerney, Jerry [D-CA-9], Sen. Murkowski, Lisa [R-AK], Rep. Payne, Donald M., Jr. [D-NJ-10], Rep. Richmond, Cedric L. [D-LA-2], Sen. Risch, James E. [R-ID], Sen. Sanders, Bernard “Bernie” [I-VT], Pres. Trump, Donald J. [R-USA], Rep. Waxman, Henry A. [D-CA-33], Sen. Wyden, Ron [D-OR]

Examples include:

- **H.R.668 - Secure High-voltage Infrastructure for Electricity from Lethal Damage Act [112th Congress (2011-2012)]** – aka: “SHIELD Act” – Sponsor: Rep. Franks, Trent [R-AZ-2], Cosponsors – 41 total, 37 Republican, 4 Democrat
- **H.R.6221 - Identifying Cybersecurity Risks to Critical Infrastructure Act of 2012 [112th Congress (2011-2012)]** – Sponsor: Rep. Clarke, Yvette D. [D-NY-11] (Introduced 07/26/2012), Cosponsors: 4 total, 3 Democrat, 1 Republican
- **H.Res.762 - Expressing the sense of the House of Representatives regarding community-based civil defense and power generation. [112th Congress (2011-2012)]** – Sponsor: Rep. Bartlett, Roscoe G. [R-MD-6] (Introduced 08/02/2012), Cosponsors listed: (all original cosponsors) Rep. Franks, Trent [R-AZ-2], Rep. Clarke, Yvette D. [D-NY-11], Rep. Johnson, Henry C. "Hank," Jr. [D-GA-4]
- **H.R.3410 - Critical Infrastructure Protection Act [113th Congress (2013-2014)]** – aka: CIPA – Sponsor: Rep. Franks, Trent [R-AZ-8] (Introduced 10/30/2013), Cosponsors: 21 total, 19 Republican, 2 Democrat
- **S.1846 - Critical Infrastructure Protection Act of 2016 [114th Congress (2015-2016)]** – aka: CIPA – Sponsor: Sen. Johnson, Ron [R-WI] (Introduced 07/23/2015), Cosponsor: Sen. Ted Cruz [R-TX]
- **S.2232 - Next Generation GRID Act [115th Congress (2017-2018)]** – Sponsor: Sen. King, Angus S., Jr. [I-ME]
- **S.346 - National Evaluation of Techniques for Making Energy Technologies More Efficient and**

Resilient Act of 2019 [116th Congress (2019-2020)] – Sponsor: Sen. Hassan, Margaret Wood [D-NH] (Introduced 02/06/2019), Cosponsors listed: (all original cosponsors) Sen. Sanders, Bernard [I-VT], Sen. Shaheen, Jeanne [D-NH], Sen. Markey, Edward J. [D-MA]

- **H.R.2962 - SMART Grid Study Act of 2013 [113th Congress (2013-2014)]** – Sponsor: Rep. Payne, Donald M., Jr. [D-NJ-10] (Introduced 08/01/2013), Cosponsors: 37 total, 32 Democrat, 5 Republican

COMMENTARY: While the quote above may look “unprofessional,” let me assure readers 2 things: First, on just short notice, I asked Jim (a constituent in FLORIDA'S 15TH U.S. Congressional District – my district too) to give me a supportive public statement so we can “join voices” and “collectively” ask our Federal (and State) lawmakers to “Protect The Grid” – thus, Jimmy's brief Facebook note isn't as professional as, say, Jim McGuire's quote above because Jimmy's a very busy business owner. **SECONDLY**, however, please take note of **ONE THING**: As smart as I am (see my creds above: United Electronic Institute, Valedictorian), Jim is my mentor **and thus far smarter all things electronic**. As BUZZFILE says, Jimmy's been in business for approximately thirty-three (33) years – as I recall, and is probably as smart as I estimate – or smarter:

COMMENTARY: While all citizens and constituents in U.S. Congressman Scott Franklin's district (FLA-15) should be listened to (especially when we ask him to spend a relatively few pennies to protect the vulnerable power and telecommunications grid), nonetheless, James is Rep. Franklin's community liaison aka outreach coordinator, and should be trusted, by his boss, Rep. C. Scott Franklin, to offer sound advice, even if it is implicit advice, as here. PROOF:

LINK: <https://www.Facebook.com/james.ring.7106/about>

(8) U.S. Congressman C. Scott Franklin (R-FL-15) – **QUOTE:** “June 17, 2021 Press Release
WASHINGTON — Rep. Franklin issued the following statement in response to [reports](#) that President Biden provided Russian President Putin with a list of infrastructure entities "off limits" to cyberattacks:

“The federal government’s policy on cyberattacks against our infrastructure should be that all such attacks are unacceptable. President Biden giving Russian President Vladimir Putin a list of 16 critical infrastructure entities that are “off limits” signals weakness and emboldens the Kremlin to continue its cyber operations against our country. We must draw a line in the sand with Russia and make clear that cyberattacks originating from Russian forces or its proxies will not be tolerated.””

(9) YOU, dear reader: Do you like to use your smartphone, **be able to CALL “911,”** get on the Internet, and have your Electric Utilities **and earth's orbiting satellites** all functioning well? Well, then, it might be a good idea for you to review these legislative proposals in light of the science—and actual historical records of **very** scary events in in **recent** years—close calls that are “too close for comfort.” – And, offer your support – **by intentions, words, and actions: CALL YOUR LAWMAKERS NOW—politely, but firmly, asking they act!**

(10) John R. Anderson, a constituent of Congressman Franklin, residing in U.S. Congr. Dist. FL-15
Do Congressman Franklin's constituents matter? Besides all the right-leaning Conservative **Republicans**

who support protecting the grid, my good friend, John R. Anderson, a [Democrat](#) who lives in my U.S. Congressional District, FL-15, represented by U.S. Rep. C. Scott Franklin (R-15), also agrees with the rest of us. (“Grid” is indeed infrastructure, an issue where there is wide bipartisan support—both among lawmakers and among us “common folk,” e.g., regular Americans.) After I informed my congressman, on his Facebook, that earth's protective magnetic field is collapsing, and that he would need to “support grid upgrade legislation, cuts to pork spending to fund it, and vocally support S.2598, the bankruptcy defense bill which would make key higher ed pork subsidy cuts politically viable,” **John responded in kind:**

John Anderson said: “Nailed it [Gordon Wayne Watts](#) - Like my sales managers have always said - know the difference between activity and productivity. I saw the solar flare notes from NASA and read this is only the beginning of an 11 year cycle of solar flares that can cause MAJOR problems to navigation and communications. [] Cut pork and the NDA. Congressman Franklin cares more about Afghanistan than district 15. What ever happened to make America Great?”

Gordon Wayne Watts responded: “[John Anderson](#) -- as my grid research confirms, the solar cycle is projected to increase and peak in a few years while the protective geomagnetic field is slowly but surely collapsing... aa [sic] we head into a pole flip-- a phenomenon which earth encounters every 100 thousand years or so. Will you call his office as I ask folks on my recent wall post, tagging you...and ask others to do likewise?”

John Anderson replied: “[Gordon Wayne Watts](#) Yes. This world is about to go back to 1513 if navigation and communications are disrupted. Instead this congressman is playing on the fears of people and supporting violence against our democracy and the democratic process (which he swore to uphold as a military officer and as a congressman). He has failed on both.”

((18)) Solar Super Storm of 2012:

In September 1859, the famous “Carrington Event” occurred (with estimated Dst readings of –850 nT to –900 nT), the largest recorded solar geomagnetic event since accurate records were made, causing widespread failures to contemporary telegraph systems and producing brilliant polar aurorae. In July 2012, a solar storm of much greater strength almost hit earth, narrowly missing because we'd moved about nine (9) days [about 2.46% of earth's 365¼–day orbit] from its trajectory[18a], with a peak Dst value of –1,182 nT, as reported by Space Weather[18b]. As earth's 'magnetic north pole' accelerates its erratic movement, earth's protective magnetic field has begun to speed up its collapse, which would leave us completely vulnerable to another solar flare event.

[18a] “**Powerful solar storm narrowly missed Earth in 2012,**” by Scott Sutherland, Meteorologist / Science Writer, *The Weather Network*, 02 May 2014,

LINK: <https://www.TheWeatherNetwork.com/news/articles/powerful-solar-storm-narrowly-missed-earth-in-2012/26473>

Archive-1: <http://Archive.vn/wip/7vzks>

Archive-2:

<https://Web.Archive.org/web/20190127081856/https://www.TheWeatherNetwork.com/news/articles/powerful-solar-storm-narrowly-missed-earth-in-2012/26473>

Small “Fair Use” Quote: “The current 'K–index' used to rate solar flares wasn't in use then, but studies have estimated the strength of the Carrington super flare at somewhere around X40 or higher, which is well off the maximum practical end of the scale (which only goes up to X9.9). [] However, as it turns out, it doesn't take one of these scale–shattering solar flares to produce this kind of powerful CME, and this means that we could be at a higher risk from solar flares than we previously thought...Given that this CME missed us by roughly 9 days, the use of the word 'narrowly' when describing how close it came to us may seem a bit excessive. However, when you look at those 9 days compared to the length of our year (the time it takes Earth to travel once around the Sun), the distance between us and the CME was only about 3 per cent of our orbital path. That's a *pretty narrow miss.*”

COMMENT: Actually, 9 days divided by 365¼ days is only 2.46%, rounded to 3 significant figures.

[18b] “**A major solar eruptive event in July 2012: Defining extreme space weather scenarios,**” by Baker, D. N.; Li, X.; Pulkkinen, A.; Ngwira, C. M.; Mays, M. L.; Galvin, A. B.; Simunac, K. D. C., *Space Weather*, Volume 11, Issue 10, pp. 585–591, October 2013 DOI: 10.1002/swe.20097 Bibcode: 2013SpWea..11..585B,

((19)) The Infamous 1989 Solar Storm:

The infamous solar storm of March 1989 inflicted major damage to Quebec, Canada's power grid[19a], causing a 9-hour blackout when transformers were overloaded and failed, leaving more than 6 million Canadians without power, and crashing computer hard-drives later that year (August 1989), resulting in halted trading in the Toronto stock market.[19b] In fact, astronauts aboard the space shuttle Atlantis, during this solar storm, in October 1989, “reported burning in their eyes, a reaction of their retinas to the solar particles,” according to the book “Storms From The Sun.”[19c]

[19a] “**The Day the Sun Brought Darkness,**” by Dr. Sten Odenwald, NASA Astronomer, *NASA*, March 13, 2009, Last Updated: Aug. 7, 2017 (Editor: Holly Zell),

LINK: https://www.NASA.gov/topics/earth/features/sun_darkness.html

Archive-1: <http://Archive.vn/IxTF>

Archive-2:

https://Web.Archive.org/web/20200617184320/https://www.NASA.gov/topics/earth/features/sun_darkness.html

Small 'Fair Use' Quote: “On March 13, 1989 the entire province of Quebec, Canada suffered an electrical

power blackout. Hundreds of blackouts occur in some part of North America every year. The Quebec Blackout was different, because this one was caused by a solar storm! [] On Friday March 10, 1989 astronomers witnessed a powerful explosion on the sun. Within minutes, tangled magnetic forces on the sun had released a billion-ton cloud of gas. It was like the energy of thousands of nuclear bombs exploding at the same time. The storm cloud rushed out from the sun, straight towards Earth, at a million miles an hour. The solar flare that accompanied the outburst immediately caused short-wave radio interference, including the jamming of radio signals from Radio Free Europe into Russia. It was thought that the signals had been jammed by the Kremlin, but it was only the sun acting up!”

[19b] “A massive solar storm could wipe out almost all of our modern technology — and we'd have just hours to prepare,” by Rafi Letzter, *BUSINESS INSIDER*, 06 September 2016,

((20)) The recent 2003 Storm

Another solar storm hit Canada, as well as the northeast United States, in August 2003, causing wide-spread blackouts, this time jamming the short-wave radio frequencies used by commercial pilots, prompting contemporary observers to speculate that the Kremlin was jamming radio signals. “In space, some satellites actually tumbled out of control for several hours,” NASA said.

(21) Key news from George Noory, host, Coast to Coast: AM

QUOTE: “George Noory has announced a campaign to protect and insulate the U.S. power grid against an EMP (electromagnetic pulse) event or attack via nuclear weapons, ballistic missiles and solar flares, all of which could endanger the lives of millions of Americans. More on the campaign at [WND](#).”

SOURCE: “George Noory Launches EMP Protection Campaign,” by News Staff, *Coast to Coast: AM*, Monday, August 04, 2014,

LINK: <https://www.CoastToCoastAM.com/article/george-noory-launches-emp-protection-campaign/>

Archive-1: <https://Archive.vn/iCBKE>

Archive-2: <https://Web.Archive.org/web/20180417192442/https://www.coasttocoastam.com/article/george-noory-launches-emp-protection-campaign>

QUOTE: “The threat of an electromagnetic pulse event or attack on the United States that could kill tens of millions of people has prompted George Noory, host of "[Coast to Coast AM](#)," the most-listened-to overnight radio program in North America, to launch a campaign to prepare a defense. [] "I implore all individual states, the president and members of Congress to immediately develop a plan to protect our power grid," said Noory. "The preservation of our great nation and the lives of its people are critical."...The goal is to protect and insulate the U.S. power grid against an EMP event or attack from a solar flare, nuclear weapon or ballistic missile, all of which could endanger the lives of millions of Americans, according to Noory. [] The work follows on the heels of a recent report from NASA scientists that Earth narrowly avoided a catastrophic X-class solar flare on July 23, 2012. [] According to WND senior staff writer F. Michael Maloof, whose book, "[A Nation Forsaken](#)," addresses the EMP threat, the United States could be turned into a virtual 19th-century agrarian society. [] The problem is that an EMP would take out virtually all electronics. The controls that enable gas to be pumped into a vehicle, systems that control underground pipelines, the computers controlling financial systems, the electronics in vehicles, communications, emergency services, law enforcement and much more could all be rendered useless...Noory's campaign will feature scientific experts and government leaders on his program, which reaches more than 3 million listeners weekly...WND will leverage its reach of 6 million unique visitors each month and more than 40 million page views to support and promote efforts to improve defense capabilities. [] "The preservation of our great nation and the lives of its people are critical. It is not a matter of if, but when we will experience an EMP event or attack. We need to be ready now. I want to thank WND and Joseph Farah for joining this effort, which is imperative to our future," Noory said. [] WND founder and Editor-in-Chief Joseph Farah stated: "I'm so grateful to George Noory for recognizing the threat to our grid as the No. 1 catastrophic threat to national security. If the grid goes down, it could spell the starvation deaths of tens of millions of Americans. It's hard to top that threat. George Noory's platform, coupled with WND's, significantly raises the probability of getting Congress to take responsibility for addressing this threat, which, by all accounts, is not an expensive fix nor a technically difficult one..."For less than \$2 billion, we can harden our grid against an EMP if we can get SHIELD Act legislation passed soon. Once passed, it will take another five years to accomplish the task of hardening the national grid system if there are no hitches," [Maloof] said...Principal backers of EMP legislation so far include **Reps. Trent Franks, R-Ariz., Yvette Clarke, D-N.Y.**, and the other

members of the bi-partisan **Congressional Electromagnetic Pulse (EMP) Caucus**, who have introduced the SHIELD Act and CIPA in the House.

There are several proposals pending:

- H.R. 2417 Secure High-voltage Infrastructure for Electricity from Lethal Damage (“SHIELD Act”). 113th Congress (introduced June 18, 2013).
- H.R. 3410 Critical Infrastructure Protection Act (“CIPA”). 113th Congress (introduced Oct. 30, 2013).
- Grid Reliability and Infrastructure Defense Act (“GRID Act”). 113th Congress (introduced March 26, 2014)
- Senate Bill S. 2158
- House Bill H.R. 4298

Some of the proposals call for actual protections for the grid. Another simply would have the government include an EMP event in its planning procedures for various scenarios.”

Editor's Note: This quote, while lengthy, is NOT a full quote, and this portion is claimed under “Fair Use” legal standards, for academic research, criticism, & commentary purposes.

((22)) A special word from Dr. Peter Vincent Pry, Chief of Staff of the newly re-established Congressional Electromagnetic Pulse (EMP) Commission, and Executive Director of the Task Force on National and Homeland Security – personal email from Dr. Pry to the undersigned writer, Gordon Wayne Watts

I asked Dr. Pry for advice on writing my lawmakers:

----- Forwarded message -----

From: <peterpry@verizon.net>

Date: Fri, Nov 12, 2021, 8:49 AM

Subject: RE: BLACKING OUT CIVILIZATION WITH ROBOTIC TERRORISM

To: Gordon Watts <gww1210@gmail.com>

Gordon—Yes, 10-20 kms is impressive. So impressive we have been trying for years to recruit Yuri Tkasch, who had been the USSR’s chief NNEMP weapons designer, but he won’t leave what’s left of his design bureau, in Ukraine. As to contacting senators and congressmen: 1) A phone call to their office is more impressive than a letter or e-mail (they count the number of phone calls received on issues); 2) A letter is more impressive and is weighted more heavily than an e-mail; 3) Any communication should be respectful but firm. Display your expertise. Volunteer to provide congressman and staff with technical advice and help to understand the issue, draft legislation. 4) Reference and/or provide copy of President Trump’s EMP Executive Order, noting it is also supported by the Biden Administration. Why is there no money in the infrastructure bill to implement the EMP Executive order, just studies? 5) Attached find an e-copy of my new book Blackout Warfare that you might want to send to enlighten them further. Thanks for being an EMP Warrior!—Peter

From: Gordon Watts <gww1210@gmail.com>

Sent: Friday, November 12, 2021 8:37 AM

To: peterpry@verizon.net

Subject: Re: BLACKING OUT CIVILIZATION WITH ROBOTIC TERRORISM

Thanks for clarifying, Peter.

But even if directional (and not omnidirectional or radial), still, 10 to 20 km is real impressive.
In other news, you've read enough of my e-mails to lawmakers, where I cc copy you, that you kind of know my writing style. [] ... *[Redacted for brevity: I asked him for advice on writing lawmakers re protecting the grid.]*

I asked Dr. Pry for permission to share our private e-mail exchange with lawmakers:

from: **Gordon Watts** <gww1210@gmail.com>
to: peterpry@verizon.net
cc: Peter.pry@emptaskforce.us, "Gww1210@aol.com" <gww1210@aol.com>,
Gordon Watts <gww1210@gmail.com>
date: Nov 16, 2021, 12:56 PM
subject: Dr. Pry, can I drop your name as a reference for EMP matters?
mailed-by: gmail.com

Dr. Pry,

you would not mind, would you, if I shared your advice about EMP matters with lawmakers would you? Here's the screenshot in question, a small snippet of my question, and your answer. It lends me great credibility when I can say "I'm friends with the legendary Dr. Peter Vincent Pry," and not simply that I am valedictorian of my electronics class as shown below...

AS, United Electronics Institute, VALEDICTORIAN

S.3688 - Energy Infrastructure Protection Act of 2020 [116th Congress (2019-2020)] << **"BAD" BILL**

EDITOR'S NOTE: This is the only "bad" bill so far on this topic, according to my research, as industry experts called it out for various concerns, including, but not limited to the following: The bill allegedly "codifies a major departure from the original intent for transparency & public disclosure," and, specifically, that this bill restricts transparency and access to the public by "Exporting the "Security through Obscurity" regime to other government agencies by offering assistance to those agencies in labeling information as Critical Energy Infrastructure Information (CEII) in order to prevent FOIA access." ("FOIA" refers to the Freedom of Information Act, that allows ordinary citizens to get hold of

public information from their government.) And, for: "Codifying government inaction and regulatory malfeasance by releasing FERC from any responsibility for untimely processing of FOIA requests, establishing that FERC's failure to grant or deny a request after (1) year from submission will automatically designate the requested information as CEII and for a period of 10 years. ("FERC" stands for the Federal Energy Regulatory Commission, "NERC" stands for the North American Electric Reliability Corporation, and "CEII" stands for "Critical Energy Infrastructure Information," i.e., an excuse to claim it is classified, and thus shielded from the public view.)

Sponsor: **Sen. Murkowski, Lisa [R-AK]** (Introduced 05/12/2020)

Cosponsor: **Sen. Risch, James E. [R-ID]**

<https://www.congress.gov/bill/116th-congress/senate-bill/3688>

EDITOR'S NOTE: This undersigned writer does not mean to suggest lawmakers acted with ill intent, as they might have gotten bad legislative staff advice, but readers can look at my research at one of the following mirrors:

JIM MCGUIRE wrote:

Good morning Gordon, As you know, I couldn't agree more with you that we need to harden our grid. We have been lucky so far but we are very vulnerable. However, I have very little faith in our government and I don't think anything will be done until we have a massive solar flare/CME like the Carrington Event that knocks out our grid. It is human nature to not want to spend money to be prepared for something that may or may not happen. Look at how our govt treats our transportation infrastructure. The govt constantly waits until it's too late to expand or build new roads. Heck, we have thousands of bridges that are 90 years old and no plan or money saved up to replace them. Politicians keep spending the entire budget on pet projects and kicking the can down the road (pun intended). It's a hard sell to tell the public that we will need to raise taxes to protect us from something that they don't remember happening in their lifetime. I hope things change though! Also, I enjoyed your paper. Very thorough. It must have taken hours of research.

GORDON WAYNE WATTS wrote:

Thank you for your kind words, Jim! Indeed, my published scientific paper (which I plan on sending to lawmakers soon) took about a month of solid work. However, if you look closely, you'll notice that three (3) "Carrington-class" events occurred in recent times:

1.) The infamous solar storm of March 1989 inflicted major damage to Quebec, Canada's power grid, causing a 9-hour blackout when transformers were overloaded and failed, leaving more than 6 million Canadians without power, and crashing computer hard-drives later that year (August 1989), resulting in halted trading in the Toronto stock market. In fact, astronauts aboard the space shuttle Atlantis, during this solar storm, in October 1989 reported burning in their eyes as highly-charged solar particles hit them.

2.) Another solar storm hit Canada, as well as the northeast United States, in August 2003, causing widespread blackouts, this time jamming the short-wave radio frequencies used by commercial pilots, prompting contemporary observers to speculate that the Kremlin was jamming radio signals. "In space, some satellites actually tumbled out of control for several hours," NASA said.

3.) More recently, the "Solar Storm of 2012," documented to have have been even larger than the largest previous solar storm in recorded history, almost made a "direct hit" on earth, narrowly missing only because earth had moved about nine (9) days [about 2.46% of earth's 365¼-day orbit] in solar orbit from its trajectory. As earth's 'magnetic north pole' accelerates its erratic movement, earth's protective magnetic field has begun to speed up its collapse, which would leave us completely vulnerable to another solar flare event.

You are right, Jim, that both politicians AND citizens have probably forgotten all 3 of these catastrophic disasters-- but they're big enough, scary enough, & recent enough to document that I think we can convince lawmakers, the President, and news media to act if we politely but firmly demand lawmakers grant Trump's request for grid upgrades, in his recent EO (Executive Order), cited in my published paper:

[Important caveat: I made only ONE typo in my paper: here. The link in my paper used long dashes due to a copy/edit clean-up gone awry. The CORRECT link is below.]

"Trump Acts on Critical Infrastructure Resiliency Against EMP Threats," by Sonal Patel, POWER, 26 March 2019

<https://www.PowerMag.com/trump-acts-on-critical-infrastructure-resiliency-against-emp-threats> Small 'Fair Use' Quote: "President Trump has signed an executive order (EO) to boost coordination for and national resilience against electromagnetic pulse (EMP) threats—both from nuclear warfare and natural events like solar superstorms. The action suggests new federal mandates to protect critical infrastructure against EMP events and attacks may be on the horizon...Industry and academia have warned for years—and the DHS has internally recognized that—EMP events, and especially high-altitude EMP (HEMP) events resulting from detonation of a nuclear device, could severely damage critical electrical infrastructure...If the E3 pulse is high enough and long enough, it can result in grid collapse and potentially damage transformers, experts warn. [] Solar weather events of sufficient intensity can cause E3-type electromagnetic impacts. In 1989, for example, a geomagnetic disturbance (GMD) caused a regional grid collapse within 92 seconds in the Hydro-Quebec power system that left six million customers without power for up to nine hours. The threat of GMDs has been played up with good reason: Space weather researchers currently estimate a 6% to 12% chance that a Carrington-class storm—a solar storm comparable in size to the largest on record—is likely to hit the earth within the next 10 years."

Cited here: https://www.Academia.edu/40529432/WATTS_SolarFlarePAPER

If we explain to lawmakers and their dedicated and polite phone staff that "911," Internet, and Electric Power could go out and leave them stranded, our arguments might be persuasive. What do you think ?

Can we handle it ourselves, or is it time to invoke our treaty with the Klingons, Greys, Vulcans, and Jedi--to ask for additional persuasive scientific experts to testify before Congress, the U.N., and U.F.P. (United Federation of Planets)? We wouldn't want to create an interstellar incident, now would we? (Or is it an "intergalactic incident?" Translation from Klingon to English is still hard.)

All Star Trek (Star Wars, UFO) humour aside, he heh, in all seriousness, here is my conclusion:

**** CONCLUSION ****

1) We need to upgrade the power, communications, satellite, & infrastructure grids.

2) This is only possible if we make much-needed spending cuts to Pork Barrell waste spending.

3) The "key" area of pork is Student Debt: The U.S. Debt, now north of \$20 or \$22 TRILLION, has about Two (\$2,000,000,000,000.00) Trillion student Debt -- i.e., almost ten (10%) percent. Note: A trillion is a MILLION millions = a little dough.

4) The only "hammer" strong enough to convince lawmakers to lower loan limits on student loans using our taxpayer dollars sufficient to "send a message" to banks and colleges to stop lobbying for THIS PORK WASTE is probably passage of H.R.2648 and S.1414, student loan bankruptcy bills. (In fact, forgiveness of ALL student loans, as one friend's petition closing in on HALF A MILLION SIGNATURES here asks <https://www.Change.org/p/covid-19-economic-response-cancel-student-loans-by-executive-order> would cost almost NO taxpayer dollars and add almost NOTHING to U.S. Debt -- as almost all Student Loans are OWNED, not guaranteed, but the taxpayer dollars via the Dept of Ed.)

Either bankruptcy defense or outright forgiveness would use FREE MARKET pressures to scare lenders (the Dept of Ed using tax\$\$) to STOP loaning obscenely high amounts-- thus forcing spending cuts sufficient to help us afford the upgrades).

I am Conservative as indicated here <https://www.Change.org/p/u-s-senators-we-can-t-address-covid-19->

[due-to-pork-spending-lawmakers-grant-trump-spending-cuts-request](#) and don't "personally" support total forgiveness-- wanting to pay a fair amount for my college-- but I must admit these so-called Liberal relief packages would be VERY effective to forcing needed spending cuts. Contrary to lawmakers' constant complaints, neither returning bankruptcy to student loans (like it was decades ago) or outright loan cancellation would cost much, as they own these toxic loans -- not guarantee. (A little-known clause in the ACA bought said loans, so we no longer guarantee any current student loans.)

The only other area where we might make "big time" cuts is foreign entanglements, but President Trump is limited on how much we can reduce our foreign military intervention and presence abroad.

I feel that if lawmakers follow my 4-point plan above, we might be able to make these needed grid upgrades. If not, then we'll see all the scary stuff about weather catastrophic disasters described in Jesus's discourse in Matthew 24, Mark 13, Luke 21, and the book of Revelation. It's gonna happen (Jesus predicted it!), but I say let's stall the inevitable by a generation or two by polite but firm calls to Federal Lawmakers to follow my 4-step plan.

What so you think?

Thank you. With kind regard, I am,

Sincerely,

Thank you for your kind words, Jim! Indeed, my published scientific paper (which I plan on sending to lawmakers soon) took about a month of solid work. However, if you look closely, you'll notice that three (3) "Carrington-class" events occurred in recent times:

1.) The infamous solar storm of March 1989 inflicted major damage to Quebec, Canada's power grid, causing a 9-hour blackout when transformers were overloaded and failed, leaving more than 6 million Canadians without power, and crashing computer hard-drives later that year (August 1989), resulting in halted trading in the Toronto stock market. In fact, astronauts aboard the space shuttle Atlantis, during this solar storm, in October 1989 reported burning in their eyes as highly-charged solar particles hit them.

2.) Another solar storm hit Canada, as well as the northeast United States, in August 2003, causing wide-spread blackouts, this time jamming the short-wave radio frequencies used by commercial pilots, prompting contemporary observers to speculate that the Kremlin was jamming radio

that the Kremlin was jamming radio signals. "In space, some satellites actually tumbled out of control for several hours," NASA said.

3.) More recently, the "Solar Storm of 2012," documented to have been even larger than the largest previous solar storm in recorded history, almost made a "direct hit" on earth, narrowly missing only because earth had moved about nine (9) days [about 2.46% of earth's 365 $\frac{1}{4}$ -day orbit] in solar orbit from its trajectory.

As earth's 'magnetic north pole' accelerates its erratic movement, earth's protective magnetic field has begun to speed up its collapse, which would leave us completely vulnerable to another solar flare event.

You are right, Jim, that both politicians AND citizens have probably forgotten all 3 of these catastrophic disasters-- but they're big enough, scary enough, & recent enough to document that I think we can convince lawmakers, the President, and news media to act if we politely but firmly demand lawmakers grant Trump's request for grid upgrades, in his recent EO (Executive Order), cited in my published paper:

(In fact, forgiveness of ALL student loans, as one friend's petition closing in on HALF A MILLION SIGNATURES here asks <https://www.Change.org/p/covid-19-economic-response-cancel-student-loans-by-executive-order> would cost almost NO taxpayer dollars and add almost NOTHING to U.S. Debt

would cost almost NO taxpayer dollars and add almost NOTHING to U.S. Debt -- as almost all Student Loans are OWNED, not guaranteed, but the taxpayer dollars via the Dept of Ed.)

Either bankruptcy defense or outright forgiveness would use FREE MARKET pressures to scare lenders (the Dept of Ed using tax\$\$) to STOP loaning obscenely high amounts-- thus forcing spending cuts sufficient to help us afford the upgrades).

I am Conservative as indicated here <https://www.Change.org/p/u-s-senators-we-can-t-address-covid-19-due-to-pork-spending-lawmakers-grant-trump-spending-cuts-request> and don't "personally" support total forgiveness-- wanting to pay a fair amount for my college-- but I must admit these so-called Liberal relief packages would be effective to forcing needed spending cuts.

Contrary to lawmakers' constant complaints, neither returning bankruptcy to student loans (like it was decades ago) or outright loan cancellation would cost much, as they own these toxic loans -- not guarantee. (A little-known clause in the ACA bought said loans, so we no longer guarantee any current student loans.)

The only other area where we might make "big time" cuts is foreign entanglements, but President Trump is

bought said loans, so we no longer guarantee any current student loans.)

The only other area where we might make "big time" cuts is foreign entanglements, but President Trump is limited on how much we can reduce our foreign military intervention and presence abroad.

I feel that if lawmakers follow my 4-point plan above, we might be able to make these needed grid upgrades. If not, then we'll see all the scary stuff about weather catastrophic disasters described in Jesus's discourse in Matthew 24, Mark 13, Luke 21, and the book of Revelation. It's gonna happen (Jesus predicted it!), but I say let's stall the inevitable by a generation or two by polite but firm calls to Federal Lawmakers to follow my 4-step plan. What so you think?

Trump Acts on Critical Infrastructure...

COMMENTARY: While the quote above may look “unprofessional,” let me assure readers 2 things: First, on just short notice, I asked Jim (a constituent in FLORIDA'S 15TH U.S. Congressional District – my district too) to give me a supportive public statement so we can “join voices” and “collectively” ask our Federal (and State) lawmakers to “Protect The Grid” – thus, Jimmy's brief Facebook note isn't as professional as, say, Jim McGuire's quote above because Jimmy's a very busy business owner. **SECONDLY**, however, please take note of **ONE THING**: As smart as I am (see my creds above: United Electronic Institute, Valedictorian), Jim is my mentor **and thus far smarter all things electronic**. As BUZZFILE says, Jimmy's been in business for approximately thirty-three (33) years – as I recall, and is probably as smart as I estimate – or smarter:

Some one today asked my opinions
 on a couple of subjects. ?
 Our power grid is vulnerable to EMF
 attacks.congress let's fix it.
 Let's close the border now.
 Student loan forgiveness under
 certain conditions yes.
 3.5 trillion Bill
 Hell no.
 Give illegal border aliens ss benefits
 Hell no

Good job, and thank you for weighing in on these subjects. Just one more thing: Do you, as a fellow-Conservative, agree with me that this student loan bankruptcy bill-- which now has twice as many GOP sponsors as Democrats -- <https://www.congress.gov/.../senate-bill/2598/cosponsors> , is a good Conservative alternative to the massive Liberal free handouts currently under discussion?

A good argument for this is found at <https://ContractWithAmerica2.com/#bankruptcy> , and besides the Free Market arguments that bankruptcy would curb excessive lending/spending, the argument that I like best is that bankruptcy uniformity is not a Free Handout but rather required the U.S. Constitution's Uniformity clause. Thanks for your assessment and hopefully support of the Comyn/Hawley/Durbin bill here.

A man who can draw 50,000 ppl in a cornfield does not lose an election to a man who could not draw 500 people in a major city.

RECAP – **((7)) Sgt. James Ring, retired, LAKELAND (FLA.) POLICE DEPARTMENT, and currently the Outreach Coordinator for U.S. Congressman C. Scott Franklin (R-FL-15)** – In response to my recent Facebook video post, a promo for the "Black Sky Event" movie about protecting the power/telcom grid from Solar Storms, EMP attacks, hacking, and cyber-attacks etc, James had this to say:

QUOTE: "Thank you for highlighting an emerging threat."

LINK: <https://www.Facebook.com/GordonWayneWatts/videos/577765013536627/>

Archive-1: <https://GordonWatts.com/FannyDeregulation/JamesRing-screenshot.PNG>

Archive-2: <https://GordonWayneWatts.com/FannyDeregulation/JamesRing-screenshot.PNG>

Archive-6:

<https://Web.Archive.org/web/20211026222545/https://contractwithamerica2.com/FannyDeregulation/JamesRing-screenshot.PNG>

COMMENTARY: While all citizens and constituents in U.S. Congressman Scott Franklin's district (FLA-15) should be listened to (especially when we ask him to spend a relatively few pennies to protect the vulnerable power and telecommunications grid), nonetheless, James is Rep. Franklin's community liaison aka outreach coordinator, and should be trusted, by his boss, Rep. C. Scott Franklin, to offer sound advice, even if it is implicit advice, as here. PROOF:

Gordon Wayne Watts
You're welcome, James Ring-- and, thank *you* for being receptive. My most-recent post is of the same video, but in higher quality, and I adjusted the audio for my friend, Glenn Rhoades' commentary to help a little. Glenn is a member of the EMP Taskforce on which the legendary Dr. Peter Pry is also a member.

RECAP –

(10) John R. Anderson, a constituent of Congressman Franklin, residing in U.S. Congr. Dist. FL-15

Do Congressman Franklin's constituents matter? Besides all the right-leaning Conservative **Republicans** who support protecting the grid, my good friend, John R. Anderson, a **Democrat** who lives in my U.S. Congressional District, FL-15, represented by U.S. Rep. C. Scott Franklin (R-15), also agrees with the rest of us. (“Grid” is indeed infrastructure, an issue where there is **wide bipartisan support—both among lawmakers and among us “common folk,” e.g., regular Americans.**) After I informed my congressman, on his Facebook, that earth's protective magnetic field is collapsing, and that he would need to “support grid upgrade legislation, cuts to pork spending to fund it, and vocally support S.2598, the bankruptcy defense bill which would make key higher ed pork subsidy cuts politically viable,” **John responded in kind:**

John Anderson said: “Nailed it **Gordon Wayne Watts** - Like my sales managers have always said - know the difference between activity and productivity. I saw the solar flare notes from NASA and read this is only the beginning of an 11 year cycle of solar flares that can cause MAJOR problems to navigation and communications. [] Cut pork and the NDA. Congressman Franklin cares more about Afghanistan than district 15. What ever happened to make America Great?”

Gordon Wayne Watts responded: “**John Anderson** -- as my grid research confirms, the solar cycle is projected to increase and peak in a few years while the protective geomagnetic field is slowly but surely collapsing... aa [sic] we head into a pole flip-- a phenomenon which earth encounters every 100 thousand years or so. Will you call his office as I ask folks on my recent wall post, tagging you...and ask others to do likewise?”

John Anderson replied: “**Gordon Wayne Watts** Yes. This world is about to go back to 1513 if navigation and communications are disrupted. Instead this congressman is playing on the fears of people and supporting violence against our democracy and the democratic process (which he swore to uphold as a military officer and as a congressman). He has failed on both.”

LINK: https://Facebook.com/story.php?story_fbid=270958745037132&id=100063690264265

Caveat: Congressman Franklin has “limited viewership” of comments, so that you might have to be on my friend's list to see it. See below for unredacted PDF prints:

Archive-5: See below for screenshots to verify:

**Congressman Scott Franklin** 

November 1 at 2:51 PM ·

Today and every day, we honor our nation's heroes for their service and sacrifice. Over the next 11 days leading up to Veteran's Day, we'll be recognizing local veterans throughout the district.

Today, we're honoring 102 year old World War II veteran, Corporal Herman Jenkins. Corporal Jenkins is a Lakeland native and graduated from Washington Park High School in 1937. He enlisted in the [U.S. Army](#) in 1943 and proudly served with the 3123rd Quartermaster Service Company. During WWII, Corporal Jenkins deployed to the European theatre, where he guarded supply depots and German prisoners of war.

Upon returning home in 1946, Corporal Jenkins became a self-taught photographer until his retirement, in addition to his roles as a security guard and stock room manager. He now enjoys spending his free time with his wife, Essie Mae Jenkins, a 95 year old retired Polk County Public Schools educator, and their family.

On behalf of the entire 15th Congressional District, thank you for your service to our nation!

On behalf of the entire 15th Congressional District, thank you for your service to our nation!

**Gordon Wayne Watts**

We certainly *do* appreciate your honouring of our veterans, including 102-year old Col. Jenkins, depicted here, but to echo others regarding your duties, I will paraphrase: "Activity" (what you're doing here and elsewhere) does **NOT** equate to "Productivity." Do you understand what we're saying? While I can't including screenshots in replies to your Facebook page, here, I see **John Anderson** ask what you're doing to keep our nation together. In case you missed it, my prophecies and predictions regarding Solar Flare threats are now coming to pass, and as documented in my recently published scientific paper on this issue, earth's protective geomagnetic field (which protects against such Solar threats) is slowly but surely collapsing. <https://www.hournemouthecho.co.uk/news/>

issue, earth's protective geomagnetic field (which protects against such Solar threats) is slowly but surely collapsing. <https://www.bournemouthecho.co.uk/news/national/uk-today/19682486.massive-solar-flare-cause-mobile-gps-signal-failures-weekend/> If you truly care about this man, depicted above, you absolutely will support grid upgrade legislation, cuts to pork spending to fund it, and vocally support S.2598, the bankruptcy defense bill which would make key higher ed pork subsidy cuts politically viable, and, by contrast, you will collapse and crash the grid, the dollar, and your formerly stellar reputation if you fail here. See <https://ContractWithAmerica2.com/#grid> for solutions... And act! BE A CONSERVATIVE AND CUT PORK AND PROTECT OUR GRID, SCOTT.

This is why you may might not be able to...

(22) A special word from Dr. Peter Vincent Pry, Chief of Staff of the newly re-established Congressional Electromagnetic Pulse (EMP) Commission, and Executive Director of the Task Force on National and Homeland Security – personal email from Dr. Pry to the undersigned writer, Gordon Wayne Watts

I asked Dr. Pry for advice on writing my lawmakers:

----- Forwarded message -----

From: <peterpry@verizon.net>

Date: Fri, Nov 12, 2021, 8:49 AM

Subject: RE: BLACKING OUT CIVILIZATION WITH ROBOTIC TERRORISM

To: Gordon Watts <gww1210@gmail.com>

Gordon—Yes, 10-20 kms is impressive. So impressive we have been trying for years to recruit Yuri Tkasch, who had been the USSR's chief NNEMP weapons designer, but he won't leave what's left of his design bureau, in Ukraine. As to contacting senators and congressmen: 1) A phone call to their office is more impressive than a letter or e-mail (they count the number of phone calls received on issues); 2) A letter is more impressive and is weighted more heavily than an e-mail; 3) Any communication should be respectful but firm. Display your expertise. Volunteer to provide congressman and staff with technical advice and help to understand the issue, draft legislation. 4) Reference and/or provide copy of President Trump's EMP Executive Order, noting it is also supported by the Biden Administration. Why is there no money in the infrastructure bill to implement the EMP Executive order, just studies? 5) Attached find an e-copy of my new book Blackout Warfare that you might want to send to enlighten them further. Thanks for being an EMP Warrior!—Peter

From: Gordon Watts <gww1210@gmail.com>

Sent: Friday, November 12, 2021 8:37 AM

To: peterpry@verizon.net

Subject: Re: BLACKING OUT CIVILIZATION WITH ROBOTIC TERRORISM

Thanks for clarifying, Peter.

But even if directional (and not omnidirectional or radial), still, 10 to 20 km is real impressive.

In other news, you've read enough of my e-mails to lawmakers, where I cc copy you, that you kind of know my writing style. [] ... *[Redacted for brevity: I asked him for advice on writing lawmakers re protecting the grid.]*

I asked Dr. Pry for permission to share our private e-mail exchange with lawmakers:
