# Global Warming: Fact and Fiction

 GORDON WAYNE WATTS · TUESDAY, SEPTEMBER 29, 2015

Since I'm asking for help here, from Jim McGuire, the [May Hemsience](#) Science guy, in this morning's segment at Mayhem in the AM: <https://www.facebook.com/Mayheminth...> (listen live at AM1430 in Lakeland, Fla. and call in at 863-682-1430), about what's up in global warming, it's only right of me to find something: [""Gore also uses an argument that the correlation between carbon dioxide concentration and temperature in ice core records from the distant past, as shown in Figure 3, demonstrates that carbon dioxide and temperature are strongly related. However, a statistical correlation between two variables doesn't determine which one is causing the relationship and which one is responding. If one looks at these data in finer detail, as shown in Figure 4, it becomes evident that temperature is driving the carbon dioxide concentration, not the other way around.""]

<http://www.icr.org/article/does-carbon-dioxide-drive-global-warming/>

Flash Gordon Wayne Watts' thoughts: maybe global warming is happening, but maybe it causes CO2 increases, instead of the other way around.

Also, Wikipedia shows that CO2 levels constantly fluctuate, whether or not there is interference from mankind: it fluctuated a lot in the past: [https://en.wikipedia.org/wiki/Global\\_warming](https://en.wikipedia.org/wiki/Global_warming)

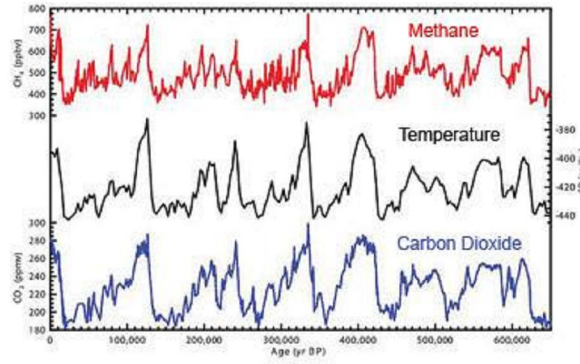

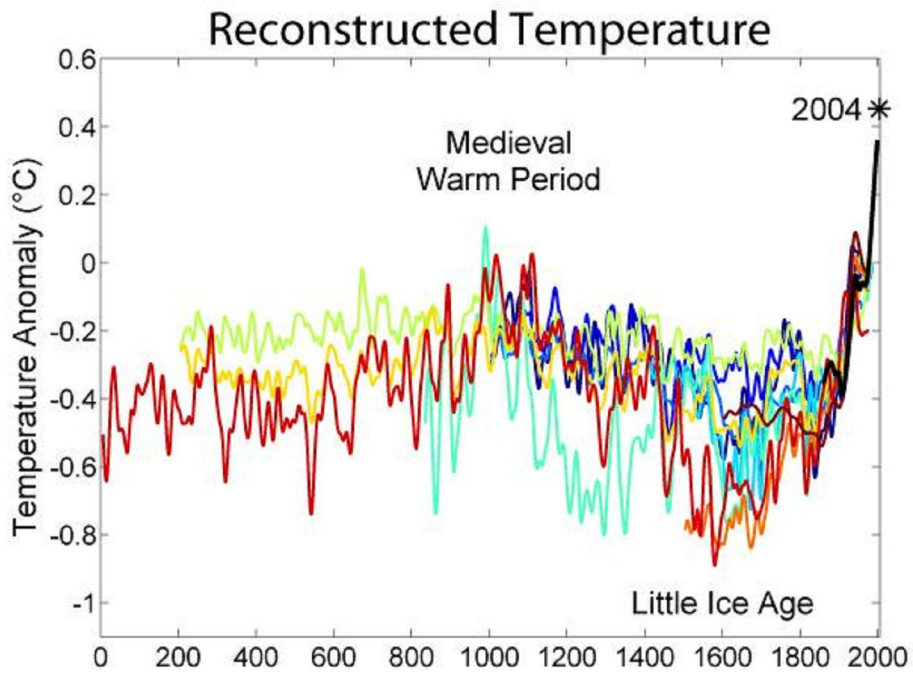

Figure 3. Comparison of carbon dioxide and temperature in ice cores.<sup>7</sup>

[https://en.wikipedia.org/wiki/File:Evidence\\_CO2.jpg](https://en.wikipedia.org/wiki/File:Evidence_CO2.jpg)

Global Warming is also fluctuating - with or without mankind's interference:

[https://en.wikipedia.org/wiki/File:2000\\_Year\\_Temperature\\_Comparison.png](https://en.wikipedia.org/wiki/File:2000_Year_Temperature_Comparison.png)

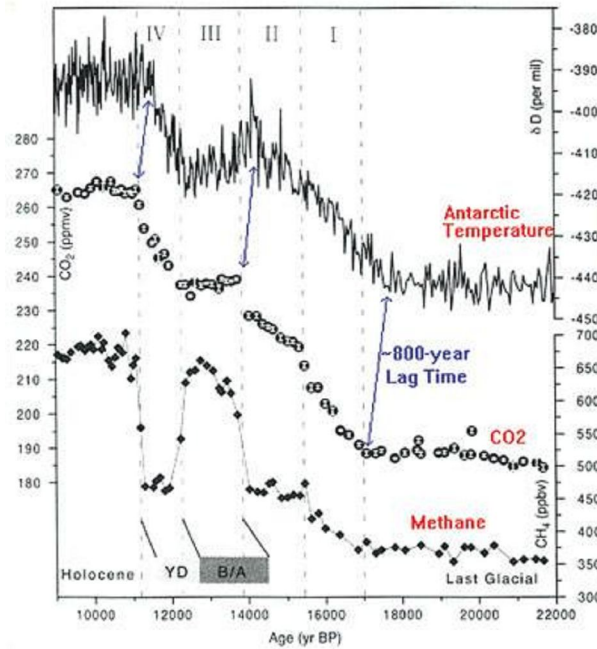

Figure 4. Detailed trends in carbon dioxide and temperature in ice cores.<sup>8</sup>

This shows that increases in temperature LEAD (cause) the CO2 increases: Older data at right, and the CO2 does not CAUSE the increase in temp, but rather is CAUSED by it!

This shows that increases in temperature LEAD (cause) the CO2 increases: Older data at right, and the CO2 does not CAUSE the increase in temp, but rather is CAUSED by it!

Judy Fuller, Robert More and Gordon Wayne Watts like this.

**Gordon Wayne Watts** I'm a conservative who uses science to prove that CO2 increases don't cause global warming but rather are a result of it - and moreover, CO2 is GOOD for plants (which breath it). However, I do NOT approve of polluting our environment. In other words, while I'm not perfect, I am a 'good' conservative.

**Ron Hornback** gordon did you know that julie roy blocks people that disagree with her?

· 2 · October 1, 2015 at 9:48am

**Gordon Wayne Watts** No. Does she also delete the posts from those people, [Ron Hornback](#)? Who did she (or her moderator(s)) block?

· 2 · October 1, 2015 at 3:12pm

**Ron Hornback** Me for one. The posts come up but there is no section for me to comment. It does say people commented

· 2 · October 2, 2015 at 5:16am

**Gordon Wayne Watts** [Ron Hornback](#) email her thru either her website or a regular email. It is probably a bad call-screener. - I may, if I get a moment, ask myself. I can Facebook email her.

**Shawn Gilliam** Co2 is a natural resource brother [Gordon Wayne Watts](#). Co2 is needed for plants to grow, the same organization (EPA) that has demonized co2 is also demonizing sunlight. Also, FDA is demonizing Distilled water (rain water) See where this going? What is needed for Organic plants to grow? Co2, Sunlight, and rain water.

· 2 · November 5, 2015 at 8:21am · Edited

**Shawn Gilliam** They are trying to push food offered to Idols on the public. You should watch the video on Youtube GMO Seeds of Death full move.

· 2 · November 5, 2015 at 7:44am

**Shawn Gilliam** Also Brother [Gordon Wayne Watts](#), think about this. Co2 is a natural process. In the mountains, in very hot places, lava flows over coal, and as a result we get the Carbon mixing with the Oxygen in the air. This

forms Co2. This Co2 is then breathed in by Organic plants and breathed out for Oxygen for us. Truth be told brother, when you start to study the Super plants they are making, you start to understand man's attempt to play God. These plants actually can withstand being sprayed by very toxic poisons, not die, and still grow. Genetically modified seed of 2 organisms is mixed together to make these gmo based plants.

· 2 · November 5, 2015 at 11:36am · Edited

**Shawn Gilliam** So God didn't make these plants, man did by genetically modifying and forcing 2 genes that wouldn't normally go together into one plant.

· 2 · November 5, 2015 at 11:35am · Edited

**Gordon Wayne Watts** Yep - man is wayward and sinful

· 3 · November 5, 2015 at 1:11pm

**Shawn Gilliam** That is very true brother! I feel like the church, who truly comes into agreement about food offered to Idols should be passing it along to the community. I know the scriptures tell me, if a brother be with an idolator don't even eat with them.

**Gordon Wayne Watts** UPDATE / and not to self: [Coast to Coast AM](#) was good enough to take my phone call to Linda Moulton Howe ( <https://twitter.com/Earthfiles> / <https://www.EarthFiles.com> ) She said that the rapidity with which CO2 has increased of late - along with the rapid increase in earth temperature - showed that CO2 caused increased temps, and not the other way around, and that it was man-made. -- Of course, I oppose pollution, but I was on the opposite side of this debate. -- nonetheless, CAVEAT: I don't know it all: Note to self - check out her claims. -- [Gordon Wayne Watts](#) aka "Gordon in Lakeland, Fla., between Tampa & Orlando" ///

**Gordon Wayne Watts** Resolution: The [Klingon High Council](#) has reviewed this matter, and finds that both sides are partly correct: There has, indeed, been a spike of recent (both a spike, e.g., a sudden increase, in temperature and a CO2 spike), and this strongly infers man-made interferences (CO2 or otherwise, that is indeterminate at this point), but temperature - AND CO2 fluctuations occur with OR WITHOUT mankind's aid and meddling, as shown by the ancient past records, listed above. Moreover, Carbon Dioxide (CO2) is a natural compound that is utilised by plants - what they breath - and thus helpful in some manner. However, just because it's "naturally occurring" does not render it harmless, as, for example, Mercury, Lead, Cadmium, Uranium, and Arsenic are ALL "naturally occurring," and yet poisons that should NOT inhabit the ocean. -- CONCLUSION: Does CO2 poison the ocean? Answer: On our honour, we are not attempting to be biased: The jury is still out. -- [Klingon high chancellor, Gordon Wayne Watts](#), reporting///
